Springfield, MO 65803

Dear Betty, Erik and Greg:

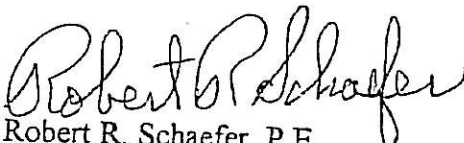

After the meeting last week, City crews were able to install manhole lids with vents on those manholes that overflowed in the most recent storm event. It should not be necessary to install other manhole lids with openings, as the only value is to provide relief at these overflow points.

In order to give you a good idea of what the City is doing in trying to minimize any problems regarding back up of sewage into your homes, I would like to offer to schedule a visit to our sewer operations section so that you can meet the people that are working on this problem and can be briefed on what we have done, what remains to be studied and what we have found as we have performed studies of the sewers tributary to the area of Fairway and Division.

If you would give me a call at 864-1920 and let me know a convenient time that you could meet with us, I will see that we schedule this visit. We could meet with each of the committee members separately or at the same time depending on your preference. You may want to contact the other committee members if you would like to try to schedule it at the same time.

If you have any questions in regard to this matter, please let me know.

Very truly yours,

Robert R. Schaefer, P.E.
Assistant Director of Public Works
